EDUCATION

Brown University, Master of Science in Electrical and Computer Engineering. **GPA: 4.0/4.0** Sep 2024 – May 2026
Relevant Coursework: Deep Learning, Machine Learning, Computer Vision, Coordinated Mobile Robotics, Reintegrating AI
Engineering Representative of Brown University Pre-Law Graduate Society
Harvard University, Exchange Scholar Sep 2025 – Jan 2026
Coursework: Startups from Idea to Exit; analyzed 10+ early-stage startups on product-market fit, go-to-market, and scaling
Soochow University, Bachelor of Engineering in Electrical Engineering. GPA: 3.7/4.0 Sep 2020 – Jun 2024
Awards: Honorable Mention, Mathematical Contest in Modeling; National 2nd Prize, Electronic Design Automation

TECHNICAL SKILLS

- **AI & Agents**: LangGraph, LangChain, MCP, OpenAI APIs, FAISS, RAG, prompt engineering, PyTorch, TensorFlow
- **Cloud & Enterprise Platforms**: Microsoft Foundry/Azure AI, GCP, Neo4j, PostgreSQL, Slack, Jira, Confluence
- **Engineering**: Python, SQL, Kubernetes, Docker, FastAPI, REST APIs, React, Next.js, Git, CI/CD
- **Languages**: English, Mandarin Chinese, French (basic)

PROFESSIONAL EXPERIENCE

Lume Security (pre-seed startup) **New York, NY**
Founding AI Engineer Jun 2026 – Sept 2026

- Partnered with enterprise customers to translate operational requirements into AI-enabled workflows, automating Jira/Confluence processes, multi-step approvals, and Slack-based notifications across 10+ customer workflows
- Built reusable Microsoft Foundry solutions integrating enterprise knowledge retrieval, tool invocation, memory, guardrails, and model deployment across repeatable customer use cases
- Established an AI evaluation and governance framework across 38 business scenarios, combining deterministic safety checks, regression testing, and human escalation to validate production reliability and policy compliance

NASA **Houston, TX**
AI Team Lead, Brown & RISD Team in SUIT Design Jan 2026 – Mar 2026

- Led a cross-functional engineering and UI/UX team developing a multimodal AI assistant for astronaut voice-command, telemetry, and navigation workflows; one of 10 teams selected nationwide
- Translated technical AI system requirements into actionable interface and workflow specifications for non-technical UI/UX teammates, enabling cross-functional delivery of an integrated prototype for NASA evaluation

leelab.ai, Brown University **Providence, RI**
Machine Learning Research Assistant Feb 2025 – Aug 2025

- Built an EEG processing pipeline for 2048 Hz multi-session data; developed a visual-target detection model achieving 87% accuracy with nested cross-validation across 11 subjects
- Presented research in lab meetings and coordinated with clinical teams at an affiliated hospital on data collection

Meritco Services **Jiangsu, China**
Consulting Analyst Intern Mar 2022 – Jun 2022

- Supported market-entry and growth strategy engagements for technology and manufacturing clients, including international expansion of digital products
- Synthesized expert interviews, market research, and quantitative findings into executive-ready recommendations for senior consultants

SELECTED AI PROJECTS

RedlineAI: Agentic Contract Review System | GitHub Mar 2026 – May 2026

- Developed a multi-agent contract review workflow that converted legal requirements into structured risk decisions with evidence chains and human escalation
- Designed graph-backed retrieval across clauses and cross-references, reducing OpenAI API calls by 75%

Multi-Agent Quantitative Trading System, EasyA x Stellar Hackathon | GitHub Oct 2025 – Nov 2025

- Built a multi-agent trading system for strategy, risk, and settlement workflows using LangChain and GPT-4o tool calling
- Implemented a contextual multi-armed bandit for strategy selection using market-state features
